1923 - 2024  
MORE THAN 100 YEARS OF HUMMEL

# THIS IS OUR HISTORY

## 1923

Albert Messmer develops one of the first football cleats in the world. With his brother Michael Ludwig Messmer, he founds the company Messmer & Co., that will go on to become known as hummel.

## 1956

The visionary Bernhard Weckenbrock takes over the company. He creates a comprehensive brand identity and introduces the chevrons.

## 1969

The first sportswear collection is launched. Sponsorships are signed and help boost sales. A rounder version of the bumblebee than the current one is created.

## 1968

The first sponsorship deal is signed. The deal is with Duisburg, a team playing in the 2nd German Bundesliga.

## 1970

hummel is introduced to the Northern European market.

## 1979

hummel signs a sponsorship deal with the Danish national team for the first time – a deal that lasts until 2004.

## 1988

hummel signs a sponsorship deal with Real Madrid and the club's biggest star, Emilio Butragueño. The deal makes hummel products even more popular.

# 1999

hummel gets a new owner – Thornico. Christian Stadil becomes part of the brand history. He launches a reintroduced, original sport style collection on the fashion market and hummel becomes a trendsetting sports apparel brand.

# 1992

It's a surprising win, to say the least. The Danish national team takes the title at the European Championships having played Germany in the final.

# 2020

In 2020 hummel team up with the historic football club Everton FC and return to the Premier League after 13 years of absence. The chevrons are back on the biggest football stage again!

# 2019

In 2019, hummel substantiates its status as an original handball brand by signing the German handball club, THW Kiel – unarguably one of the biggest clubs in the World.

# 2016

After many years hummel once again sponsors a team in the German Bundesliga. SC Freiburg plays a sensational first season after returning to the first league and qualifies for international competition.

# 1923

## 100 YEARS IN SPORT

In 2023, we celebrated a century of hummel – marking 100 years of proud heritage in the world of sports.

# THERMO BONDED

## INNER CARCASS BLADDER

The restricted carcass bladder does not allow the ball to increase its size. It ensures the stability of the outer cover material and makes the ball last longer.

## POLYESTER LINING

The polyester lining strengthens the bond between the bladder and the foam layer in order to improve shape retention for a longer life.

## HIGH PERFORMANCE FOAM LAYERING

The foam layer creates a soft touch feel and greater bounce along with high reactive speed off the foot. the ball perfectly round.

## PERFECTLY ROUND PU SURFACE

The Thermo Bonded footballs are made with no thread and no stitching. It's made with Heat Infused Technology (HIT), that increases the shape conformity and makes the ball perfectly round.

# HYBRID & KINETIC

## WEIGHT STABILIZING BLADDER

The fiber winded SR bladder is used to achieve correct weight and strong foundation for the outer cover material.

## POLYESTER LINING

The inner lining prevents the foam from cracking and tearing.

## EXTRA SOFT FOAM LAYERING

The extra thick foam layer in the Hybrid / Kinetic balls ensures greater durability and life along with reduced impact and a soft feeling on the foot.

## RESISTANT PU SURFACE

Still being machine stitched, the Hybrid/Kinetic balls are sealed by heat pressure making the balls last longer and keep them perfectly round.

# MACHINE + HAND STITCHED

## INNER BLADDER

Inner rubber bladder giving vivacity and bounce to the ball and securing minimum expansion over time.

## POLYESTER LINING

Machine Stitched : It controls damage to the foam and helps close seams efficiently.  
Hand stitched: 3 – 4 layers of polyester are used as a replacement for foam and improves shape retention and rebound.

## LIMITED LAYER OF FOAM

With a very limited foam layer the regular balls are slightly harder than others. Hand stitched balls with no foam at all.

## STITCHED PU SURFACE

Regular footballs are either machine stitched or hand stitched meaning the seams are not sealed. Still with only 10% water uptake.

# FOOTBALL INFLATION GUIDE

## PREPARATION

During wintertime we suggest to store the footballs at room temperature [20 – 25°C] for minimum 24 hours before the first inflation in order to secure optimal softness and shape.

Unfold the football with both hands and shake the bladder free.

## VALVE OIL

Drip 1 – 2 drops of hummel valve oil into the valve. It is important that valve-oil is used at every inflation as it makes the valve seal properly.

## INFLATE

Position the valve upwards and insert the inflation needle straight into the valve.

Always use a long pump needle to ensure the needle does not damage the valve or the bladder.

## CHECK PRESSURE

— Inflate the ball to the recommended pressure.

— Recommended pressure is printed on the ball near the valve.

— Inflate slowly to allow the ball to gain its correct shape. Rapid inflation can damage the bladder.

— Use a pressure gauge to check the pressure of the ball.

---

# FOOTBALL MAINTENANCE GUIDE

## BEFORE EACH INFLATION

Always drip 1 – 2 drops of hummel valve oil into the valve before inflation to ensure that it seals properly.

## STORAGE

Store the ball at reduced pressure in a dry ventilated room at 20 – 25°C.

## CLEANING AND DRYING

After use clean the football in mild soapy water and rinse with water. Then wipe the ball off with a towel and let it fully dry in a dry, airy place at 20 – 25°C.

Never dry the ball on or near a heating device.

## THICK FOAM-BACKED PU SURFACE

With Air Touch foam to back a thick PU surface, you're sure to experience extra softness and a better grip. The PU of Storm Pro has even been upgraded with a microfiber padding providing a whole new dimension of softness.

## FROM CRADLE TO CRADLE

A SUSTAINABLE SPORT CATALOGUE

**This Sport Catalogue is a cradle-to-cradle certified product.**

This means that you turn the pages of a guaranteed sustainably printed product, which is 100% biologically decomposable and completely free of any toxic chemicals and heavy metals. It also means that in producing this catalogue, we have reused the earth's resources in a natural circular process, leaving no harmful waste materials, which are dangerous to people or the environment. In other words, you could bury this catalogue in your garden and even plant

vegetables on top without damaging the environment or your health!

The Cradle-to-Cradle certification is a holistic environmental certification which guarantees that a product does not pollute or eat into the earth's limited resources but enters nature's own circuit. In line with our Company Karma philosophy, we encourage these new environmentally responsible and circular processes, securing a healthy world for future generations, from cradle to cradle.
